Summary

Computer Science Engineering graduate with strong foundations in Data Structures, Object-Oriented Programming, and Database Management Systems. Experienced in developing scalable backend services and full-stack web applications using Python, FastAPI, and React. Passionate about software development, system design, and building efficient solutions to real-world problems. Continuously learning and exploring modern technologies to build impactful software solutions.

Education

Parul University, Vadodara, Gujarat 2022 – 2026
B.Tech in Computer Science Engineering – Artificial Intelligence CGPA: 7.38 / 10

Experience

Python Assistant Trainer | GamutX Aug 2025 – Nov 2025

- Delivered technical training on Python programming, focusing on core concepts such as data structures, modular programming, and debugging practices.
- Guided students in developing automation scripts and building basic REST APIs using Python frameworks.
- Assisted in debugging code, improving code structure, and applying clean coding principles in student projects.
- Introduced Git-based version control workflows to manage code repositories and collaborative development.

Projects

LakshyaAI – Resume Intelligence Platform 2026 – Present

- Developing a platform that analyzes resumes and generates ATS-style feedback for job readiness.
- Implementing resume parsing and automated skill extraction to evaluate candidate profiles.
- Designing backend services using FastAPI and REST APIs for resume analysis workflows.
- Building a React dashboard to visualize ATS score insights and career recommendations.

AI-Powered Portfolio Platform 2026

- Developed a full-stack portfolio platform with secure authentication and cloud deployment.
- Implemented JWT authentication and OTP-based email verification for secure user access.
- Integrated an AI assistant enabling interactive exploration of projects and skills.
- Built REST APIs and deployed the backend infrastructure on cloud hosting.

QuickPrint – Self-Service Printing Kiosk System 2025

- Built a kiosk-based printing system enabling QR-based document uploads from mobile devices.
- Implemented backend job tracking and automated print workflow management.
- Designed dynamic pricing logic for print configuration and page selection.
- Developed the system using React, TypeScript, FastAPI, SQLAlchemy, and SQLite.

Skills

Programming: Python, SQL
Web Development: HTML, CSS, React, FastAPI, Flask
Computer Science: Data Structures, OOP, DBMS, Operating Systems
Databases: PostgreSQL, SQLite
Tools: Git, GitHub, VS Code, PyCharm
Professional Skills: Communication, Team Collaboration, Problem Solving, Analytical Thinking, Time Management
